

Natural Spring At Home

Classic • Perfect • Versatile

Diamond Classic, a stylishly designed water system, filters and provides good and clean water at your convenience 24/7 in the comfort of your home. Your family and you can enjoy safe quality drinking water at the touch of one button

Diamond Classic Generating Good Water with Cutting Edge Technology and Essential Benefits for You

We designed Diamond Classic in our pursuit of better water. Enhancing our breakthrough six-filter patented technology with natural energy ceramic beads (made of ancient mineral stones, nano silver activated

charcoal and other natural substances), Diamond Classic produces clean, safe, impurity-removed good water which is believed to be comparable to ancient limpid water.

High Quality, Pure Natural Energy Minerals - Brand New 「Diamond 3000」 Natural Energy Ceramic Beads

Natural magnetic energy released from 「Diamond 3000」 Natural Energy Ceramic Beads activates the water, leading to an increase in oxygen content and other beneficial trace elements such as magnesium, iron, potassium, fluorine and calcium. With these merits, Diamond Classic turns normal tap water mildly

alkaline (to a more body-friendly level), leading to improvements in body detoxification and metabolism. Drinking this clean and beneficial water constantly helps to enhance the general health of you and your family.

Diamond, as A Human-oriented Pioneer in The Industry, Never Stops Pursuing Perfection.

After years of research and over 50 improvements, the new Diamond Classic evolved with its stylish, ergonomic and thoughtful design. The operation and maintenance of this classic invention has never been made simpler :

Minimal Filter Replacement Process

Hidden one-touch pipes and refined filter design means replacement of filters is much easier than before.

Two-way Diverter

Brand new two-way diverter to enable the user to swap between Tap Water and Diamond Water.

Pollution -proof Filter Replacement Design

The filtration system designs no longer consist of pipes and lids, therefore preventing re-pollution during filter replacement or maintenance procedures.

Filter A Air Release Button

This well-designed pressure plug facilitates the release of water inside the filter, thus reducing the build-up of water pressure in the system.

Orchestra in Your Kitchen

Cooking can never be so much fun! Diamond Classic's in-built FM radio receiver spices up your kitchen with the most relaxing personal audio entertainment. News, Talk Programme, Weather and Traffic News, latest TOP 10 Hits... You won't have to cook in silence anymore!
